PROFESSIONAL SUMMARY

Results-driven Software Development Engineer (SDE) with strong proficiency in Java, Data Structures Algorithms, and Object-Oriented Design. Skilled in building efficient, maintainable, and scalable software systems, with hands-on experience through real-world projects and an internship at Bluestock Fintech. Currently in the final semester of MCA, focusing on system design and backend architecture, and seeking full-time software engineering opportunities to contribute to high-impact, product-driven teams.

WORK EXPERIENCE

Bluestock Fintech   Remote
Software Developer Intern   1 February 2025 - 28th March 2025

- Collaborated with the engineering team to build and optimize production-level applications for fintech solutions.
- Designed and implemented modular, reusable components while ensuring scalability and high performance.
- Optimized API performance and database queries, enhancing system responsiveness.
- Worked in an Agile environment using Git for version control and Jira for issue tracking.
- Gained real-world exposure to software architecture, backend integration, and system-level debugging.

EDUCATION

Swaminarayan University   Gandhinagar, Gujarat
Master of Computer Applications   September 2024 - August 2026
(Final Semester – Expected Completion: Aug 2026)

Leo College / GGTU University   Banswara, Rajasthan
Bachelor of Computer Applications, Percentage: 74.8%   September 2021 - July 2024

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, SQL

Core Competencies: Data Structures and Algorithms, Object-Oriented Design, System Design (HLD and LLD), Problem Solving, API Design, Database Management, Performance Optimization.

Frameworks and Tools: Git/GitHub, React.js, Node.js (learning), MySQL

Development Practices: Modular Architecture, Code Review, Agile Methodologies, Version Control

CERTIFICATIONS

- Zero to Hero in Web Scraping with Python and Regex (SkillEcted)
- HTML and CSS Bootcamp (SkillEcted)
- JavaScript Bootcamp (SkillEcted)
- Bluestock Fintech Internship Certificate (Click)

LANGUAGES

- English
- Hindi
- Gujarati

PROJECTS

- **Doctor appointment portal** - A web-based Doctor's Appointment Portal that streamlines the booking process for patients and clinics. Features include user authentication, doctor and patient dashboards, appointment scheduling, and real-time status tracking. Built using HTML, CSS, JavaScript, PHP, and MySQL for an efficient and user-friendly experience.

- **StitchFlow Suite (Enterprise Management System) — React.js, Node.js, MySQL, Tailwind CSS Architecting a role-based enterprise application with admin and supervisor dashboards. Implementing modular backend design, state management, and scalable data persistence. Emphasis on system scalability, fault tolerance, and maintainable architecture.**
